

CERTIFICATION CHECKLIST

Aviation Robotics Company — Independent Readiness Sign-Off

Used at the end of the Week 9–12 ramp phase — see GTM Strategy, Section 7

Note: Recreated from memory as a representative work sample. Company and role names are illustrative. Intended to demonstrate documentation and enablement style.

Purpose

This checklist is the objective gate between the Co-Run phase (Weeks 5–8) and full independence (Week 9 onward). A rep is certified only when every item below is checked off and confirmed by the manager — not on a fixed calendar date. Reps who need more time to stay in Co-Run rather than being certified on schedule; a rushed certification undermines the entire transfer goal of the engagement.

1. Knowledge Certification

Confirmed via a short verbal walkthrough with the certifying manager, without reference materials.

- ☐ Can state the five ICP criteria (production volume, compliance exposure, maintenance model, growth signal, budget authority) and their relative weights.
- ☐ Can explain, in their own words, why the Aviation Robotics offering is positioned as commercializing Air Force STRATFI-funded R&D for industrial buyers.
- ☐ Given a sample account profile, can correctly identify which entry point (Technical, Procurement, or Executive) to use and why.
- ☐ Can explain the three fit tiers (Priority Target / Qualified / Not Fit) and what changes in approach at each tier.
- ☐ Can explain why the Executive entry point is reserved for warm introductions or confirmed trigger events, not cold outreach.

2. Live Call Skill Certification

Confirmed via direct observation (in-person or recorded) across a minimum of 5 live or role-played calls.

- ☐ Consistently opens with a value-first statement rather than a direct time request.
- ☐ Has successfully navigated EA/front-desk screening in at least 2 observed calls.
- ☐ Adapts scripts naturally in their own words rather than reading verbatim.
- ☐ Has correctly handled at least 3 of the 4 common objection patterns (see Gatekeeper Scripts, Section 5).
- ☐ Logs call outcome, fit-tier update, and next action accurately after every call without prompting.

3. Documentation & Tools Proficiency

Confirmed via a hands-on walkthrough using a new, previously unscored account.

- ☐ Can independently score a new account using the ICP Scoring Spreadsheet and explain the resulting weighted total.
- ☐ Can select the correct cadence sequence (Technical, Procurement, or Executive) for a given account without guidance.
- ☐ Knows how and where to log a new objection pattern for the weekly team review.
- ☐ Can locate and update playbook materials (scripts, cadence, scorecard) without needing to ask where files live.

4. Independent Readiness Sign-Off

- ☐ Rep has run at least 2 full 21-day cadences with only spot-check support from the certifying manager.
- ☐ Certifying manager is confident this rep could onboard a new teammate on this motion unsupervised.
- ☐ No outstanding escalations or unresolved account issues requiring hand-back before certification.

Sign-Off

Rep Name	Certifying Manager	Date
Overall Result	☐ Certified — Independent ☐ Needs More Coaching	

Notes:

Usage Notes

- ☐ This checklist is designed to be repeatable for future new hires, not a one-time artifact for the initial ramp cohort.
- ☐ Certifying manager should be someone internal to the client team by the end of the engagement, not the outside consultant — this is itself part of the transfer.
- ☐ A rep who is not certified by Week 12 stays in Co-Run with continued spot-check support until every section above is checked off.
